Explanation of profit after tax in the financial statements for the 2nd quarter of 2026

1. Business Results

Net profit after tax in Q2/2026 recorded a loss of VND 158.9 million, equivalent to the same period last year (loss of VND 159.1 million).

Accumulated results for the first six months of 2026 recorded a loss of VND 334 million, nearly equivalent to the same period last year (loss of VND 335 million).

2. Main Reasons

During the period, the Company did not generate revenue from sales and services due to challenging market conditions.

- Fixed operating expenses (management and administrative costs) continued to incur despite the Company's efforts to minimize them.
- Financial expenses and other costs related to debt settlement and tax obligations continued to negatively affect business results.

3. Remedial Measures

To address the ongoing losses, the Company will implement the following measures:

- Operational cost control: Continue to review and optimize fixed expenses.
- Inventory liquidation: Seek suitable partners to recover capital and minimize losses.
- Revenue expansion: Develop online sales channels, cooperate with distributors, and actively seek new customers.
- Debt resolution: Accelerate collection of receivables to reduce financial pressure.
- Business restructuring: Explore options to mobilize additional resources from partners and shareholders.

Although Q2/2026 results continue to show losses, the level of loss has not increased compared to the same period last year. This indicates that the Company has begun to control extraordinary expenses. In the coming quarters, the Company will continue to implement cost-cutting measures while actively seeking opportunities to increase revenue and improve profitability.
